

Questions for the Car! – Wednesday

We are focused on endangered, threatened and invasive animals.

We met a few parrots and different types of turtles today.

We talked about how animals that are not supposed to live in a habitat can be harmful to other animals around them if they are introduced or brought into the habitat.

Ask your Camper – What turtle did you meet? What Bird did you meet? Is the turtle native to our area? Is the bird native to our area?

We met an opossum and a hedgehog today.

Ask your camper – Which one is native to our backyards? What was prehensile on the opossum.

We met a few of the Endangered animals from other places that we have here at the Zoo.

They were our Galapagos Tortoise, Clarence the White Cheeked Gibbon, Samantha and our Tigers Neil and Karma.

Ask your camper – which was your favorite? What does endangered mean? What is one thing we, as people can do to help these animals?
